PROFESSIONAL SUMMARY

iOS Developer and Data Engineer with a deep foundation in the Apple ecosystem. Apple Developer Academy alumna with proven expertise in building native, high-performance applications using Swift and SwiftUI. Skilled in architecting privacy-first mobile solutions and bridging complex data systems with intuitive user experiences.

TECHNICAL SKILLS

Languages: Swift, Python, SQL, Objective-C

Frameworks: SwiftUI, UIKit, SwiftData, CoreML, Combine, Firebase, Core Data

Tools: Xcode, Git, RESTful APIs, CI/CD, Agile Methodologies

PROFESSIONAL EXPERIENCE

Data Engineering Analyst

Apr 2024 – Nov 2025

Accenture

- Engineered and optimized scalable data architectures for enterprise clients, enhancing system reliability and performance.
- Conducted IDQ and SQL testing to ensure high-standard data quality within financial systems.
- Collaborated with cross-functional teams to integrate backend logic with front-end application requirements.

iOS Developer (Independent Projects)

Jan 2024 – Present

Product Development & App Launches

- Liyo Planet:** Designed and launched a private networking application for pairs, focusing on native Swift performance and secure real-time communication.
- ReflectlyMood:** Architected a privacy-first emotional health tracker using **SwiftData** for local statistics and data persistence.
- Luna's World:** Leading the native redesign of a major project, migrating from FlutterFlow to Swift and integrating **CoreML** for intelligent features.

KEY PROJECTS

Cipher Chase: A gamified logic puzzle application built with SwiftUI, focusing on state-driven animations and interactive UX.

Terhal (ترحل): Intelligent road-trip weather tracking application utilizing complex API integrations and location services.

EhbeKha (احبكمها): Group-based social game developed as a Macro Challenge project at the Apple Developer Academy.

EDUCATION & CERTIFICATIONS

Apple Developer Academy

Riyadh, Saudi Arabia

9-Month Academic Program Graduate

TOEFL iBT Score: 92

English Proficiency
